Description

2000 Instagram automatic likes for Your Profile. The Instagram marketing service guarantees the increment to post-2000 Likes purchases to be split into several photographs.

The service is provided with a system that once enabled it recognizes the photos posted by the profile and automatically sends the likes to the instagram photos. The service to work well should be used by posting photographs not too fast between them but at least 10 minutes away from each other. The number of likes purchased will be equally distributed on the number of instagram photographs chosen at the time of purchase. The service will always remain active until the target is reached.
